

The N2L84ES Project

Grundtvig – Adult education

The objective of our project is to use a creative, pedagogical and didactic approach to learning which will incorporate the use of ICT with art, drama, music and language. Each partner is skilled in these areas to enable easy access and learning for the target group. Strengthening participant's self-confidence and promoting their personal fulfillment will be gained by helping them to develop social, civic and cultural competencies. The development of social media tools will enable participating countries to effectively communicate with each other by uploading blogs, photos, work logs etc. This will enhance the learning experience as well as further fulfilling our goal of ES. This is further developed by each TG actively participating in all aspects of the project from brainstorming to presenting the final products.
