

SHARING ECONOMY FOR SENIORS

3rd NEWSLETTER – DECEMBER 2021

The SHES project aims to provide training for older people using Information and Communication Technologies (ICT) and the sharing economy.

In the last months of the project, partners have been working on the creation of guidelines to organize workshops with seniors.

These workshops were held in all project partner countries: France, Slovenia, Italy, Greece and Spain.

In addition, during the month of November the partners were able to meet on the occasion of the Third Transnational Project Meeting in Valencia. During the two-day meeting, among other topics, there was a round table discussion on the lessons learnt after the implementation of the workshops and a brainstorming activity on the organization of the next “Learning and Training Activity” (LTTA) in February.

SHARING ECONOMY FOR SENIORS

3rd NEWSLETTER – DECEMBER 2021

What will be done during the last months of the project?

During the month of February there will be a learning activity (LTTA) with seniors in which they will be taught in a more detailed and extensive way some practical examples about the use of technologies and sharing economy. The goal is to allow them to become more familiar with ICT and sharing economy platforms promoting active and healthy ageing and an independent life.

Finally, in March there will be the Final Transnational Project Meeting followed by the Final Conference taking place in Treviso, Italy. During this conference we will be able to listen to different speakers and discuss the importance of involving older people in a collaborative economy and to teach them, in today's digitalised world, a good use of ICT.

Despite the restrictions due to Covid-19 and the increase of cases in some parts of Europe, partners continue to work either face-to-face, when possible, or online to achieve the best objectives and results.
