IO2 Diagnostic tool for sustainable business competences

Encouraging Youth generation to take action

Partners have developed the online diagnostic test assessing sustainable business skills and knowledge of youth will aim at providing, thanks to a set of dedicated questions, what is the current level of knowledge of participant. The aim of this output is to equip recently established and wanna-be entrepreneurs' people supporting them in acquiring and developing key skills for their sustainable business.

THE IO1 Guidelines to sustainability has been finalized!

To learn and know more about the three topics of the sustainable guidelines here the link:
